Education providers who enrol international students are required to comply with the ESOS legislative framework. This framework consists of the Education Services for Overseas Students Act 2000 (ESOS Act), the National Code of Practice for Providers of Education and Training to Overseas Students 2018 (National Code) and the Education Services for Overseas Students Regulations 2019 (ESOS Regulations).

These regulatory obligations encompass the international student journey. They include the following: - ethical marketing, recruitment and ensuring students are appropriately qualified for their course, - ensuring that education agents act ethically, honestly and in the best interest of students, - formalisation of enrolment and written agreements, - orientation and support services, and - responsibilities to ensure satisfactory course

progress, attendance and completion within course duration.

This session will examine the regulatory framework that governs international education in Australia. Participants will focus on the Code to gain a better understanding of what is required to be compliant across the student journey and what constitutes good practice.
