In this forum, we seek to explore child safeguarding frameworks and legislation with a lens of supporting culturally appropriate international student support.

We will focus on impacts of child safeguarding requirements on international education provision and support, taking into account the additional vulnerabilities of international students and students under 18 years of age.

The 2-hour forum will offer insights into appropriate protections for students under 18 and consent education programs with culturally appropriate information. The session will include a key-note speaker and a panel of professionals with a broad range of expertise across both international education and child safe-guarding sectors.

This event offers a unique opportunity to delve into the intricacies of this complex space and consider the resources and preparations that can be utilized to protect international students.
